Winnipeg, Man.—Members of the Manitoba Wheat Pool executive committee met last night to discuss the 1929 crop. Unanimously agreed that the delegates, but as yet no action was taken on the proposition to pay the bank indebtedness on the 1929 crop. The bank indebtedness is \$120,000, of which the pool has paid \$100,000. The balance of \$20,000 is to be paid by the pool, but as yet no action was taken on the proposition to pay the bank indebtedness on the 1929 crop. The bank indebtedness is \$120,000, of which the pool has paid \$100,000. The balance of \$20,000 is to be paid by the pool, but as yet no action was taken on the proposition to pay the bank indebtedness on the 1929 crop.

Examination of the proposed plan indicates that the sum of \$100,000 would be available for repayment of the bank indebtedness on the 1929 crop. The bank indebtedness is \$120,000, of which the pool has paid \$100,000. The balance of \$20,000 is to be paid by the pool, but as yet no action was taken on the proposition to pay the bank indebtedness on the 1929 crop. The bank indebtedness is \$120,000, of which the pool has paid \$100,000. The balance of \$20,000 is to be paid by the pool, but as yet no action was taken on the proposition to pay the bank indebtedness on the 1929 crop.

"Under present depressed conditions and low prices for grain, the pool is in a difficult position," it is recognized that it would be difficult to question the necessity of such a deduction out of the 1929 crop. The pool is in a difficult position, it is recognized that it would be difficult to question the necessity of such a deduction out of the 1929 crop. The pool is in a difficult position, it is recognized that it would be difficult to question the necessity of such a deduction out of the 1929 crop.

The system proposed for repayment of the bank indebtedness on the 1929 crop has already been considered at a conference with the Manitoba government. The bank indebtedness is \$120,000, of which the pool has paid \$100,000. The balance of \$20,000 is to be paid by the pool, but as yet no action was taken on the proposition to pay the bank indebtedness on the 1929 crop.

## Earnings Forty Millions Less

C.N.R. Has Deficit This Year Of Ten

Toronto, Ont.—Gross earnings of the Canadian National Railways system were \$40,000,000 less this year than in 1929, but drastic economies have been effected, and the net earnings are not unduly affected.

The large savings effected, he indicated, were chiefly achieved by putting off construction work and other non-essential expenditures. The net earnings are not unduly affected. The large savings effected, he indicated, were chiefly achieved by putting off construction work and other non-essential expenditures.

While no improvement or indication of a reversal of the downward trend in earnings was visible, Sir Henry was more optimistic about the future. He said that the railway was in a "better feeling" by most people and business men. The net earnings are not unduly affected.

Winnipeg, Man.—Negotiations are nearing completion for the formation of the Dominion-wide air service.

The Dominion Air Service, which will be a joint venture of the Canadian Pacific and the Canadian National Railways, is expected to be completed by the end of the year.

The left wing Laborists stood by Premier Macdonald.

of rough cattle for the British market. In the shipload of 380 head are approximately equal numbers of two-year-olds, three-year-olds and four-year-olds, and both fat and cull cattle are included. On arrival at Manchester they will be put up for sale by auction. The unsound cattle buyers in the British Isles are being advised concerning the shipment.

Special orders are being taken to identify the cattle going forward in this shipment, and each animal bears a letter "C" inscribed on the left flank behind the neck. The veterinary inspector travels with the cattle, and it is expected that some of the castrates who supply the majority of the stock must, in order to afford them an opportunity of learning thoroughly acquainted with transportation methods, and the requirements of the operations of one of the leading British cattle markets.

The organization of this first shipment has already induced local site inquiries from some of the larger stockmen of Western Canada, who may follow this shipment to the credit of the department of their own responsibility before the close of the shipping season.

This is the first occasion on which a consignment of cattle from Western Canada has been shipped direct to the British market, and it is expected to determine the suitability of the local type and age groups for the British fat and store cattle markets.

The properly nourished child is active physically and mentally, and is the best of all children. His color is good and his eyes are bright; his appetite is good, and his weight is likely above the average for his age and sex.

The malnourished child, the child who is suffering from what we call malnutrition, looks one of two colors. He is either pale or dark. His color is good and his eyes are bright; his appetite is good, and his weight is likely above the average for his age and sex.

When a child is malnourished, the first thought is naturally as to what the child eats, and many persons jump at the conclusion that the child is suffering from a lack of food. The child cannot be properly nourished without proper foods, and in some cases, malnutrition is due to the child not getting enough food.

Rarely is an insufficient quantity of food the cause. Malnutrition is due to the child not getting the proper selection of foods. It is not a question of quantity, but of quality. The child cannot be properly nourished without proper foods, and in some cases, malnutrition is due to the child not getting enough food.

The growing child requires a generous diet, because he is growing. He needs a diet that is rich in protein, and is rich in vitamins. Children in their teens require more food than the average adult.

The growing child's diet should include a variety of foods. It should include a variety of fruits and vegetables, and a variety of meats. It should include a variety of grains, and a variety of dairy products.
